PROFESSIONAL SUMMARY

Computer Science and Engineering student with hands-on mobile app development experience in Flutter and React Native (iOS and Android). Built production-level apps integrating REST APIs, AI microservices (FastAPI and TensorFlow), and cloud services (Firebase, Vercel, Netlify). Proficient in Git/GitHub version control (70+ public repos), CI/CD pipelines, and Agile workflows. Experienced in AI/ML model development, intelligent feature integration, and App Store and Google Play Store deployment. Seeking a mobile application development internship to contribute, learn, and grow.

TECHNICAL SKILLS

Mobile Development: Flutter (Dart), React Native (TypeScript), Java (Basic), Android Studio, iOS and Android, Cross-Platform
App Deployment: App Store (iOS), Google Play Store (Android), Codemagic CI/CD, Vercel, Netlify
Backend and APIs: REST API Integration, FastAPI (Python), JWT Authentication, Google OAuth
Databases and Cloud: MongoDB, Firebase (FCM, Auth), MySQL, Supabase, Cloudinary
Version Control and CI/CD: Git, GitHub, GitHub Actions, CI/CD Pipelines
AI and Intelligent Features: TensorFlow, Python (scikit-learn), LLMs and Generative AI (Exploring)
Other Tools: Postman, HTML, CSS, JavaScript
Project and Agile: Agile Methodology, SDLC, Technical Documentation, Team Coordination, Stakeholder Communication

PROJECTS

KrushikaDhara - Smart Farming App | *Flutter, Python, FastAPI, MongoDB, AI*
GitHub: github.com/Naveenkm07/major | **Live:** krushika007.vercel.app

- Translated UI/UX wireframes into responsive, visually consistent mobile screens for a cross-platform iOS and Android Flutter app featuring AI crop disease detection (TensorFlow and FastAPI microservice via camera), real-time market prices, crop calendar, and an AI chatbot.
- Integrated third-party tools including Google Maps, Firebase FCM push notifications, FastAPI REST APIs, and JWT auth; deployed via Codemagic CI/CD pipeline with App Store and Google Play Store readiness.

OrbitPlan - Project Management App | *React Native, FastAPI, MongoDB, Firebase*
GitHub: github.com/Naveenkm07/OrbitPlan | **Live:** orbitplan.netlify.app

- Built a mobile task management app with real-time collaboration (Firebase Realtime Database), role-based access control, deadline notifications, and Google OAuth login.
- Tested, debugged, and troubleshot app across Android and iOS devices; verified device compatibility across multiple screen sizes and OS versions, ensuring consistent performance, usability, and resolving UI and runtime issues.

Pro Resume Builder | *React Native, FastAPI, MongoDB*
GitHub: github.com/Naveenkm07/Pro-Resume-Builder | **Live:** pro-resume-builder-nine.vercel.app

- Built a full-stack resume builder with live preview editor, smart PDF/DOCX upload parsing, and AI-powered features: brand analyzer, bullet impact scorer, and STAR interview answer scorer.
- Implemented JWT and Google OAuth authentication, HTML-to-PDF rendering, and RESTful backend service architecture.

PROFESSIONAL EXPERIENCE

AI/ML Intern | Ember Quest | *Apr - Jul 2024*

- Developed a Spam Email Classifier using Python, scikit-learn, and NLP (tokenization, TF-IDF vectorization, feature extraction); evaluated multiple ML classifiers and achieved high precision and recall on real-world datasets.
- Built a Soil Fertility Prediction model with 90%+ accuracy using ML classification on agricultural datasets; applied data preprocessing, feature engineering, and evaluation metrics (confusion matrix, precision, recall, F1-score) following SDLC best practices.
- Integrated ML model outputs via REST API endpoints and maintained version control using Git/GitHub; wrote clean, structured, and maintainable code in line with development standards.
- Tracked deliverables in Agile sprint cycles, identified and resolved bugs and performance issues, and delivered technical documentation and findings to team leads and stakeholders.

AI/ML Industry Trainee | Crystallize Technologies | *3 Months*

- Completed advanced training in machine learning and model optimization; worked on industry projects involving data pipelines, backend API connectivity, and deployment workflows.
- Maintained technical documentation for assigned modules and delivered structured presentations on project outcomes to mentors and stakeholders.

EDUCATION

B.E. in Computer Science and Engineering - New Horizon College of Engineering, Bengaluru | 2024-2027 | CGPA: 8.56
Diploma in Computer Science Engineering - SJM Polytechnic, Chitradurga | 2021-2024 | 82.12%
SSLC - SJM Residential School, Chitradurga | 2020-2021 | 93.12%

ACHIEVEMENTS AND LEADERSHIP

- 2nd Place - Srujana 2025 Hackathon (Chanakya University), awarded by Former ISRO Chairman.
- 2nd Prize - Mini Project Competition at NHCE, awarded by Dr. Manjunath S, Principal, NHCE.
- TEDx NHCE Board Member (2025-2026) - Coordinated event planning, stakeholder communication, and team activities.
- Participated in 10+ national-level hackathons, leading project planning, documentation, and team coordination.
- Open-source contributor maintaining 70+ public repositories on GitHub with CI/CD workflows.
