PROFESSIONAL SUMMARY

B.E. Computer Science student (2027) with hands-on experience building AI-powered, cross-platform applications and scalable distributed backend services. Designed and shipped production systems integrating agentic AI workflows, LLMs, vector embeddings, and microservices (TensorFlow, scikit-learn) across mobile (Flutter, React Native) and web React platforms. Proficient with Firebase, Docker, and SQL/NoSQL databases at scale. Proven ability to diagnose and debug complex issues in production environments, own features end-to-end, and deliver high-quality work in Agile cycles — exactly the skills Eightfold needs to build intelligent agentic talent systems. 10+ hackathons, 70+ open-source repositories.

TECHNICAL SKILLS

AI / ML: TensorFlow, Agentic AI Workflows, AI/ML Tools
Languages & CS Fundamentals: Python, SQL, Data Structures & Algorithms
Web Frameworks: React, Webpack
Cross-Platform Development: Web, Android, iOS
Containerization: Docker
Deployment & Hosting: Netlify, Vercel, Railway, Supabase

PROFESSIONAL EXPERIENCE

AI/ML Engineering Intern | *Ember Quest* Apr – Jul 2024

- Built a **Spam Email Classifier** using Python, scikit-learn, and NLP (tokenization, TF-IDF, feature extraction); evaluated Naive Bayes, SVM, and logistic regression classifiers achieving **high precision and recall** on real-world email datasets containing tens of thousands of samples.
- Developed a **Soil Fertility Prediction** model with **90%+ accuracy** on agricultural datasets backed by SQL; applied data preprocessing, feature engineering, and full evaluation (confusion matrix, precision/recall/F1), delivering actionable insights to stakeholders.
- Integrated ML model outputs via **REST API endpoints**, debugged issues across the full data and inference pipeline, and maintained version control with Git/GitHub following SDLC best practices.

AI/ML Industry Trainee | *Crystallize Technologies* 3 Months (2023)

- Completed advanced training in machine learning, model optimization, and data pipeline design; worked on industry projects involving **backend API connectivity, deployment workflows, and distributed data processing**.
- Maintained technical documentation and delivered structured presentations on project outcomes; flagged and resolved pipeline bottlenecks during production testing.

PROJECTS

KrushikaDhara — Smart Farming App | Flutter, *Python, TensorFlow, MongoDB*
GitHub: github.com/Naveenkm07/major Live: krushika007.vercel.app

- Built a production cross-platform iOS/Android app with an **AI-powered crop disease detection** microservice TensorFlow CNN, processing farmer-uploaded images in real time; integrated a **generative AI chatbot** for advisory queries powered by an LLM backend.
- Designed a scalable REST API layer with **JWT-secured endpoints**, Firebase push notifications, Google Maps integration, and CI/CD via Codemagic — achieving App Store and Play Store deployment readiness.
- Architected a **distributed backend** (microservices + MongoDB) capable of handling concurrent requests from thousands of farmers; AWS EC2/S3 deployment with environment-based configuration.

OrbitPlan — Real-Time Project Management App | React *Native, MongoDB, Firebase*
GitHub: github.com/Naveenkm07/OrbitPlan Live: orbitplan.netlify.app

- Built a **collaborative task management platform** with role-based access control, real-time deadline notifications, and Google OAuth; implemented **Redux** for state management and diagnosed/debugged cross-device compatibility issues across Android/iOS screen sizes and OS versions.
- Designed a **RESTful backend** (MongoDB) supporting multi-tenant data isolation, concurrent user sessions, and webhook-driven notification delivery via Firebase Cloud Messaging.

Pro Resume Builder | React *Native, MongoDB, LLM / AI*
GitHub: github.com/Naveenkm07/Pro-Resume-Builder Live: pro-resume-builder-nine.vercel.app

- Developed a full-stack resume builder with **live preview editing**, smart PDF/DOCX parsing, and **AI-powered features** including a bullet impact scorer and STAR interview answer scorer backed by LLM inference endpoints.
- Implemented **JWT and Google OAuth** authentication, vector-based resume similarity scoring using embeddings, and a RESTful service architecture supporting sub-second response times.

EDUCATION

B.E. in Computer Science and Engineering — **CGPA: 8.56 / 10**
New Horizon College of Engineering, Bengaluru — 2024 – 2027

Diploma in Computer Science Engineering — **82.12%**
SJM Polytechnic, Chitradurga — 2021 – 2024

SSLC — **93.12%**
SJM Residential School, Chitradurga — 2020 – 2021

ACHIEVEMENTS & LEADERSHIP

- **2nd Place — Srujana 2025 Hackathon** (Chanakya University; awarded by Former ISRO Chairman S. Somanath)
- **2nd Prize — NHCE Mini Project Competition**; **TEDx NHCE Board Member** (event production & speaker coordination).
- **10+ hackathons** across national and college levels; **70+ public GitHub repositories** with active CI/CD pipelines and open-source contributions.
