PROFESSIONAL SUMMARY

Computer Science & Engineering student with hands-on experience in CI/CD pipeline implementation, deployment automation, and version-controlled software delivery workflows. Maintains 70+ public GitHub repositories with active CI/CD using Git, GitHub Actions, Azure DevOps, Docker, and Jenkins. Completed 7 months of AI/ML internship experience in data pipeline automation, model deployment, and cross-functional team collaboration. Skilled in maintaining development, testing, and production environments; supporting application monitoring; and troubleshooting system and application issues. Proficient in Python scripting, REST API integration, and cloud platforms (AWS, Azure, GCP). Strong analytical mindset with a passion for process automation and operational excellence. Eager to contribute to deployment management and continuous improvement as an Associate DevOps Engineer at Eurofins IT Solutions.

TECHNICAL SKILLS

CI/CD & Automation: Git, GitHub, GitHub Actions, Azure DevOps, CI/CD Pipelines, Jenkins, Docker
Environment & Release Management: Development / Testing / Production Environments, Release Management, REST API Integration, Vercel, Netlify
Monitoring & Reliability: Application Monitoring, System Reliability, Performance Troubleshooting, Log Analysis, Postman
OS & Networking: Linux (Ubuntu), Windows, Networking Fundamentals (TCP/IP, HTTP/HTTPS), REST APIs
AI/ML & Data Science: Machine Learning, Deep Learning, NLP, scikit-learn, TensorFlow, Pandas, NumPy, Jupyter Notebook
Cloud Platforms: AWS (Basic), Azure (Basic), GCP (Basic), Firebase
Databases: MySQL, MongoDB, SQLite, SQL Query Optimisation
Agile & Collaboration: Agile/SDLC, Sprint Planning, Cross-functional Team Collaboration, Technical Documentation, Stakeholder Communication

PROFESSIONAL EXPERIENCE

AI/ML Intern — Ember Quest
Apr 2024 – Jul 2024 | Bengaluru

- Built end-to-end ML pipelines (ingestion, preprocessing, feature engineering, model evaluation) in Python, reducing manual effort by 30%.
- Trained and fine-tuned ML models (classification, regression, NLP) using scikit-learn and TensorFlow; tracked experiments across 70+ GitHub repos.
- Deployed ML models as REST APIs (FastAPI/Flask); monitored performance in staging and production, diagnosing data drift and latency issues.
- Collaborated with dev and QA teams to integrate ML outputs into backend systems and validate predictions against ground-truth data.
- Authored technical docs for ML pipeline modules and experiment reports; ensured reproducibility and knowledge transfer across the team.

AI/ML Industry Trainee — Crystallize Technologies
3 Months

- Trained in model deployment workflows, automation pipeline design, and system optimisation relevant to DevOps operations.
- Worked on data pipeline automation, backend API connectivity, and deployment environment setup.
- Documented pipeline modules and presented deployment outcomes, demonstrating ownership and accountability.

KEY PROJECTS

KrushikaDhara — Smart Farming Application | *Python · FastAPI · MongoDB · Firebase · CI/CD · REST APIs*
GitHub: github.com/Naveenkm07/major | Live: krushika007.vercel.app

- Configured automated CI/CD pipeline for build, test, and deployment of the full-stack app (FastAPI + Flutter), ensuring reliable release cycles.
- Maintained FastAPI + MongoDB backend on Vercel across dev, staging, and production; managed environment variables and service configs per environment.
- Integrated third-party REST APIs (Google Maps, Firebase FCM, JWT auth); monitored integration health and resolved connectivity issues.
- Diagnosed and resolved API runtime failures, environment config errors, and backend service issues to maintain system reliability and uptime.

OrbitPlan — Project Management Application | *React Native · FastAPI · MongoDB · Firebase · GitHub Actions*
GitHub: github.com/Naveenkm07/OrbitPlan | Live: orbitplan.netlify.app

- Implemented GitHub Actions CI/CD workflows for automated testing and deployment with structured branching strategies and release management.
- Managed Firebase Realtime Database and cloud integrations (Google OAuth, FCM, role-based access) across development and production environments.
- Diagnosed runtime errors, API failures, and environment-specific bugs; maintained system reliability through structured debugging and regression testing.

SecureVault — Data Management System | *Python · Flask · SQL · Docker · REST API · AES-256*
GitHub: github.com/Naveenkm07/PersonalDataManager-ADV | Live: cse-tau.vercel.app

- Built and deployed a full-stack Python/Flask app on Vercel with Git/GitHub version control; maintained clear separation between dev, testing, and production environments.
- Optimised SQL queries improving retrieval efficiency by 40%; implemented role-based access control and AES-256 encryption for secure data operations.
- Documented API endpoint configs, environment setup procedures, and deployment runbooks for reproducibility and team knowledge transfer.

EDUCATION

B.E. in Computer Science and Engineering — *2024 – 2027*
New Horizon College of Engineering, Bengaluru | CGPA: 8.56

Diploma in Computer Science Engineering — *2021 – 2024*
SJM Polytechnic, Chitradurga | 82.12%

SSLC — *2020 – 2021*
SJM Residential School, Chitradurga | 93.12%

ACHIEVEMENTS & LEADERSHIP

- 2nd Place — Srujana 2025 Hackathon (Chanakya University), awarded by Former ISRO Chairman.
- 2nd Prize — Mini Project Competition at NHCE, awarded by Dr. Manjunath S, Principal.
- TEDx NHCE Board Member (2025–2026) — event planning, stakeholder communication, and team coordination.
- Participated in 10+ national hackathons; led project planning, documentation, and team coordination.
- Open-source contributor maintaining 70+ public repositories on GitHub with active CI/CD workflows.
