Professional Summary

Computer Science and Engineering student with hands-on Flutter and React Native (iOS/Android) mobile app development experience in a fintech context. Built production-level apps integrating REST APIs, AI microservices (FastAPI, TensorFlow), and cloud services (Firebase, Vercel). Proficient in writing clean, maintainable code with Git/GitHub (70+ public repos), CI/CD pipelines, and Agile workflows. Experienced in app performance optimisation, App Store/Play Store deployment, and mobile QA including device compatibility and regression testing. Familiar with Java and Spring Boot. Seeking a Flutter internship at TapInvest to contribute to a premium investment platform.

Technical Skills

Mobile Development: Flutter (Dart), React Native (TypeScript), Android Studio, iOS & Android, Cross-Platform

Flutter & Dart: Widgets, State Management (Provider/Riverpod), Navigation, Firebase SDK, REST API Integration, App Performance Optimisation

App Deployment: Google Play Store, App Store (iOS), Codemagic CI/CD, Vercel, Netlify

Backend & APIs: REST API Integration, FastAPI (Python), JWT Auth, Google OAuth, Java, Spring Boot, Maintainable Code Architecture

Mobile QA & Testing: Manual Testing, Regression Testing, Device Compatibility Testing (Android & iOS), Bug Tracking, Appium (Basic), Postman

Databases & Cloud: Firebase (Realtime DB, Auth), MongoDB, MySQL, Supabase, Cloudinary

Version Control & CI/CD: Git, GitHub, GitHub Actions, CI/CD Pipelines, Azure DevOps (Basic)

Other Tools: Postman, HTML/CSS/JS, Power BI, Agile/SDLC, Technical Documentation

Projects

KrushikaDhara – Smart Farming App – ***Flutter, Dart, FastAPI, Firebase, TensorFlow***
GitHub: github.com/Naveenkm07/major Live: krushika007.vercel.app

- Built a production-ready cross-platform Flutter (Dart) app for iOS and Android with responsive UI/UX, smooth navigation, and consistent design across screen sizes and OS versions; applied app performance optimisation techniques to reduce load times.
- Integrated Firebase Auth, Google Maps, JWT authentication, and FastAPI REST APIs with clean, maintainable code; deployed via Codemagic CI/CD with full App Store and Play Store readiness.
- Performed manual testing and regression checks across Android and iOS devices post-feature additions, ensuring no breaking changes in core user flows.

OrbitPlan – Project Management App – ***React Native, Firebase, FastAPI, MongoDB***
GitHub: github.com/Naveenkm07/OrbitPlan Live: orbitplan.netlify.app

- Built a real-time mobile collaboration app with Firebase Realtime Database, role-based access control, deadline notifications, and Google OAuth login; maintained clean, maintainable codebase.
- Debugged and resolved UI/runtime issues across Android and iOS; verified compatibility across screen sizes and OS versions for regression and device compatibility testing.
- Tracked bugs, documented test results, and followed structured QA reporting during Agile sprint cycles.

Pro Resume Builder – ***React Native, FastAPI, MongoDB, JWT***
GitHub: github.com/Naveenkm07/Pro-Resume-Builder Live: pro-resume-builder-nine.vercel.app

- Full-stack mobile app with live preview editor, JWT/Google OAuth authentication, HTML-to-PDF rendering, and RESTful Java-compatible backend demonstrating end-to-end mobile app lifecycle ownership.
- Wrote and executed functional test cases for core API endpoints using Postman; validated authentication flows and PDF generation outputs.

Professional Experience

AI/ML Intern – Ember Quest *Apr – Jul 2024*

- Built and deployed ML models (Spam Classifier, Soil Fertility Predictor) using Python and scikit-learn; integrated model outputs via REST API endpoints with clean, maintainable, version-controlled code on Git/GitHub.
- Tracked deliverables in Agile sprint cycles, identified and resolved bugs, executed test validations, and delivered structured technical documentation to team leads and stakeholders.

AI/ML Industry Trainee – Crystallize Technologies *3 Months*

- Advanced training in ML model optimisation and deployment workflows; worked on data pipeline projects involving cleaning, transformation, and API connectivity.
- Maintained detailed technical documentation for assigned modules and presented project outcomes to mentors and stakeholders.

Education

B.E. – Computer Science and Engineering, New Horizon College of Engineering, Bengaluru *Currently Pursuing | 2024–2027 | CGPA: 8.56*

Diploma – Computer Science Engineering, SJM Polytechnic, Chitradurga *2021–2024 | 82.12%*

SSLC – SJM Residential School, Chitradurga *2020–2021 | 93.12%*

Achievements & Leadership

- 2nd Place – Srujana 2025 Hackathon (Chanakya University), awarded by Former ISRO Chairman.
- 2nd Prize – Mini Project Competition at NHCE, awarded by Principal Dr. Manjunath S.
- TEDx NHCE Board Member (2025–2026) – coordinated event planning, stakeholder communication, and team activities.
- Participated in 10+ national-level hackathons, leading project planning, documentation, and team coordination.
- Open-source contributor maintaining 70+ public GitHub repositories with CI/CD workflows.
