PROFESSIONAL SUMMARY

Computer Science Engineering student with a strong, hands-on foundation in Object-Oriented Programming, Data Structures & Algorithms, JavaScript/React, and relational databases (SQL). Quick to learn new platforms, with experience translating UI requirements into clean, component-based code and using AI coding assistants as a disciplined accelerator — verifying and refining AI-generated output rather than accepting it blindly. Strong written and verbal communicator with a track record of documenting requirements, presenting outcomes to stakeholders, and coordinating across teams through 10+ hackathons, two AI/ML training programs, and a TEDx NHCE board role. Looking to build a long-term career on the Salesforce platform, including Apex, Lightning Web Components, and Public Sector Solutions.

TECHNICAL SKILLS

Languages & Core CS: JavaScript (ES6+), Python, C, C++, SQL — Object-Oriented Programming, Data Structures & Algorithms
Web / Frontend: React, React Native, HTML, CSS, Node.js, REST API Development, Component-Based UI Design
Databases: MySQL, MongoDB, SQLite — schema design, query optimization, CRUD operations
Version Control & DevOps: Git, GitHub, Jenkins, Docker, Kubernetes, CI/CD Pipelines, Vercel
Testing & QA: Postman, Selenium WebDriver, pytest, REST API Testing
Cloud & OS: AWS, Azure, GCP (working knowledge), Linux, Windows
Process: Agile Methodology, SDLC, Requirement Documentation, Stakeholder Communication, disciplined AI-assisted development (verify-don't-blindly-trust workflow)

PROFESSIONAL EXPERIENCE

AI/ML Intern — Ember Quest *4 Months*

- Applied machine learning algorithms and structured problem-solving to real-world datasets, translating ambiguous requirements into working models.
- Collaborated using Git-based version control and Agile development practices, documenting findings and presenting results to team leads.

AI/ML Industry Trainee — Crystallize Technologies *3 Months*

- Completed structured, mentor-led training covering advanced concepts and software development best practices (SDLC).
- Delivered technical documentation and stakeholder presentations on project outcomes, strengthening written and verbal communication under guidance.

PROJECTS

OrbitPlan — Real-Time Project Management App | *React Native, MongoDB, Firebase*

- Built a collaborative task management platform using component-based UI architecture, with role-based access control and real-time deadline notifications.
- Implemented Redux for state management and diagnosed/debugged cross-device compatibility issues — directly transferable to component-driven, stateful Lightning Web Components development.

Personal Data Manager — Secure Data Management System | *Python, SQLite/MySQL, AES Encryption, Flask*

- Developed a secure data management system with authentication, role-based access control, and CRUD operations on a relational database.
- Optimized SQL queries to improve data retrieval efficiency by 40%, applying indexing and query-structuring fundamentals relevant to SOQL and Salesforce data modeling.

Pro Resume Builder | *React Native, MongoDB, LLM/AI*

- Built a full-stack resume builder with live preview editing, JWT/Google OAuth authentication, and AI-powered scoring features backed by LLM inference endpoints.
- Designed a component-based, reusable UI architecture and a RESTful service layer — the same patterns used when composing Lightning Web Components against Apex/OmniStudio backends.

EDUCATION

B.E. in Computer Science and Engineering — New Horizon College of Engineering, Bengaluru (CGPA: 8.32) 2024 – 2027

Diploma in CS Engineering — SJM Polytechnic, Chitradurga (82.12%, 2021–24) | SSLC — SJM Residential School, Chitradurga (93.12%, 2020–21)

ACHIEVEMENTS & LEADERSHIP

- 2nd Place — Srujana 2025 Hackathon, Chanakya University; awarded by Dr. S. Somanath, Former ISRO Chairman. 2nd Prize — Mini Project Competition, NHCE.
- TEDx NHCE Board Member (2025–2026); completed the GeeksforGeeks DSA course; participated in 10+ national-level hackathons leading project planning and documentation; maintains 70+ public GitHub repositories with active CI/CD workflows.
